- ✓ Tested on atopic skin
- ✓ Relieves itching
- ✓ Nourishes + repairs
- ✓ Antibacterial + anti-inflammatory

SKINREPAIR® (Ceramide, Bisabolol, Phytosterols). Powerful active ingredient that **repairs the 80% of the damaged skin's protective barrier** in 5 days. It contains Bisabolol that helps to reduce inflammation and irritation.

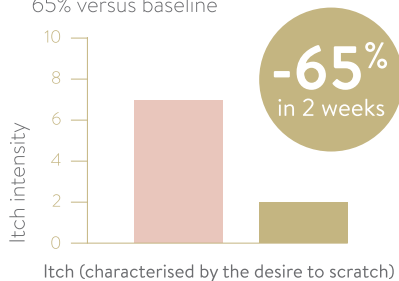

% on day 5 after SDS damage
(based on TEWL)
- dose response study -

SKINCALM® (5% solution of Dihydroavenanthramide D). It **reduces the sensation of itchiness** by 65%, preventing scratching of **dry and itchy skin**, and redness by 50% in 2 weeks. With anti-irritating properties. It helps to reduce inflammation.

REDUCTION OF ITCH SENSATIONS

Itchiness significantly reduced by 65% versus baseline

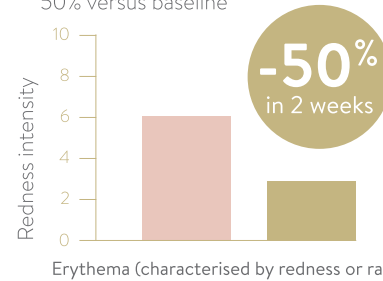

Study performed by Symrise

Baseline

2% SkinCalm®

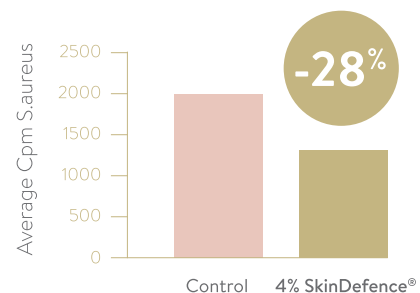

REDUCTION OF REDNESS

Erythema significantly reduced by 50% versus baseline

SKINDEFENCE® (Rhamnose, Glucose and Glucoronic Acid). It strengthens the skin's defence system as it inhibits the adhesion of undesirable bacteria and/or pathogens to the epidermis, like *Staphylococcus aureus* (bacteria causing atopic skin eruptions). It also modulates the inflammatory response in the event of aggression and protects the skin.

4% SkinDefense® inhibits the adhesion of *Staphylococcus aureus* to the epidermis by 28% ($p < 0.1$)

BODY HYGIENE

OIL SOAP

200 ml

Easy, fast and even application

What does Wet Skin Technology consist of?

Compared to a conventional sunscreen, BABÉ Wet Skin SPF 50 Transparent Sunscreen does not mix with the water on the skin's surface but penetrates through it and is instantly absorbed into the skin.

Thanks to the perfect balance of its formula, we obtain a better application and adherence on wet skin without leaving white residue.

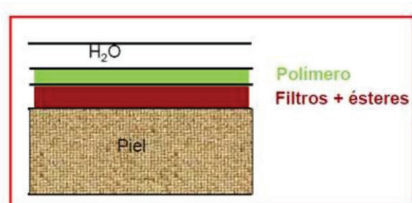

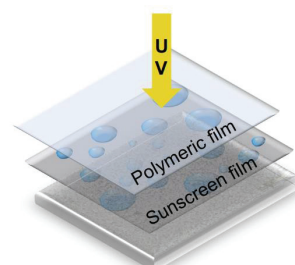

Foto-protector WetSkin aplicado sobre piel mojada
